

Section 3 - Consumer Complaints

Section 3 – The Challenge

You are working for a government agency as a Data Scientist. You have been supplied a dataset with consumer complaints received by financial institutions in 2013 – 2015.

Your task is to upload the data into a Database and perform some preliminary analysis:

- Find out how many complaints were received and sent on the same day
- Extract the complaints received in the states of New York
- Extract the complaints received in the states of New York and California
- Extract all rows with the word “Credit” in the Product field
- Extract all rows with the word “Late” in the Issue field
